Market Summary:

At the beginning of May we closed all of our position (long positions on indexes and the long position in USD against CHF) in the AEGON Vision Derivative Fund. In the second part of the month we kept mainly Hungarian government securities. At the end of the month we started to contemplate the American and European stock markets in a negative way, and we are planning to build short positions at the beginning of June on these markets. We also believe that the JPY will strengthen, and we are going to take positions to gain from this anticipation as well.

NET Yield Performance of the Fund:

Time horizon	12 months*
Net return of the Fund*	11.98%

Investment Policy of the Fund:

The Aegon Vision is the latest fund of the Fund Management Company. The investment possibilities of the fund are extremely wide. The Fund's assets will be invested according to the anticipation of the portfolio manager. The Fund mainly buys, or sells equities and equity indexes, opens currency positions, buys options and it also writes option contracts in order to earn the option premium. The fund is allowed to use double leverage by investing into derivatives and futures. This means that the value of the positions of the Fund can be the double of its capital resources. Should the price of the fund's assets change by 1% than it is possible that the asset of the fund changes by 2%. Leverage has the potential to enlarge profits or losses by the same magnitude. The greater the amount of leverage on capital you apply, the higher the risk that you will assume. The Fund is allowed to take long positions and uncovered short positions as well. According to this the Fund can bet on a bullish, or on a bearish market situation too. The fund's main goal is to over perform its benchmark which is the RMAX index + 3,00% The investors also have the opportunity to profit from the anticipations of the fund manager if it turns out that those were right. The fund manager keeps the assets of the fund in government securities, and he only invests into riskier assets if he discovers some attractive investment possibility.
