Net Asset Value per share: 1.201159

Investment Policy of the Fund:

The Aegon Vision is the latest fund of the Fund Management Company. The investment possibilities of the fund are extremely wide. The Fund's assets will be invested according to the anticipation of the portfolio manager. The Fund mainly buys, or sells equities and equity indexes, opens currency positions, buys options and it also writes option contracts in order to earn the option premium. The fund is allowed to use double leverage by investing into derivatives and futures. This means that the value of the positions of the Fund can be the double of its capital resources. Should the price of the fund's assets change by 1% than it is possible that the asset of the fund changes by 2%. Leverage has the potential to enlarge profits or losses by the same magnitude. The greater the amount of leverage on capital you apply, the higher the risk that you will assume. The Fund is allowed to take long positions and uncovered short positions as well. According to this the Fund can bet on a bullish, or on a bearish market situation too. The fund's main goal is to over perform its benchmark which is the RMAX index + 3,00% The investors also have the opportunity to profit from the anticipations of the fund manager if it turns out that those were right. The fund manager keeps the assets of the fund in government securities, and he only invests into riskier assets if he discovers some attractive investment possibility.

The NAV of the Fund is increasing spectacularly; it is very close to 5 bln HUF now. The monthly performance of the

The asset allocation of the Fund, 31.07.2008

Government paper repo	2.71%
International Equities	7.69%
Hungarian Equities	0.00%
Current account	20.25%
International Bonds	0.00%
Hungarian T-bills	0.00%
Hungarian Government Bonds	49.09%
Other assets	20.27%
Total investment assets	100.00%
Derivative products	89.44%
Net corrected leverage	102.82%

AEGON Vision Derivative Fund was almost 4%, and the one-year yield of the fund is 12.49%. The main reason of this stunning performance was that we opened short positions on major European and American indexes, and these positions generated enormous gains. In the second part of the year we are planning to take aggressive and concentrated positions in the capital markets, which will represent heavy risk, but we hope that we will reach remarkable gains on these positions. The volatility of the Fund will stay high in the future. At the end of the month we held serious positions in Hungarian government securities and the above-mentioned short positions.

NET Yield Performance of the Fund:
