Net Asset Value per share: 1.129564

Investment Policy of the Fund:

The Aegon Vision is the latest fund of the Fund Management Company. The investment possibilities of the fund are extremely wide. The Fund's assets will be invested according to the anticipation of the portfolio manager. The Fund mainly buys, or sells equities and equity indexes, opens currency positions, buys options and it also writes option contracts in order to earn the option premium. The fund is allowed to use double leverage by investing into derivatives and futures. This means that the value of the positions of the Fund can be the double of its capital resources. Should the price of the fund's assets change by 1% than it is possible that the asset of the fund changes by 2%. Leverage has the potential to enlarge profits or losses by the same magnitude. The greater the amount of leverage on capital you apply, the higher the risk that you will assume. The Fund is allowed to take long positions and uncovered short positions as well. According to this the Fund can bet on a bullish, or on a bearish market situation too. The fund's main goal is to overperform its benchmark which is the RMAX index + 3,00% The investors also have the opportunity to profit from the anticipations of the fund manager if it turns out that those were right. The fund manager keeps the assets of the fund in government securities, and he only invests into riskier assets if he discovers some attractive investment possibility.

The asset allocation of the Fund, 30.09.2008

Government paper repo	8.73%
International Equities	14.66%
Hungarian Equities	0.00%
Current account	12.94%
International Bonds	0.00%
Hungarian T-bills	19.02%
Hungarian Government Bonds	52.06%
Other assets	-7.40%
Total investment assets	100.00%
Derivative products	46.27%
Net corrected leverage	47.25%

Market Summary:

The AEGON Vision Derivative Fund suffered serious losses in September. This fact had more reasons: the Hungarian government securities part of the portfolio dropped a lot this month, and on the other hand a lot of our positions suffered also because of the stop-loss orders. The former risk controlling methods were not adequate in these terrible volatile markets, so we will do significant changes in our investment strategy to limit further risks.
