### INVESTMENT POLICY OF THE FUND

The AEGON Istanbul Equity Fund primarily targets the stock exchange-traded shares of companies that maintain an active presence in Turkey, or generate a substantial proportion of their revenues in the Turkish market. The Fund predominantly invests in equities, but its portfolio also contains bonds and discount treasury bills, currencies and money-market products, to ensure the Fund's liquidity. The equity investments are usually denominated in foreign currency; however the fund may hedge some or all of the currency risk arising from these liabilities by concluding forward or option transactions. Although the Turkish market promises a high potential return, the value of investments may display a marked degree of fluctuation in the short term, and therefore it is advisable to treat the Fund as a long-term investment. The Fund Management primarily bases its investment decisions on its own fundamental analyses, but it also makes use of the information and analyses provided by other investment service providers, banks and independent research companies, in the interests of reducing risks and maximising returns. The fund's benchmark: 95% TR20I Index + 5% ZMAX Index.

### MARKET SUMMARY

Global equities tumbled in the first half of March, sending the MSCI World index to a 3 month low amid concern that worst earthquake on record and nuclear crisis in Japan may derail global economic recovery. While inflation concerns also increased on escalating turmoil in Middle East, equity markets bounced back in the second half of March. Valuations and fundamental drivers, such as earnings momentum and margins remain attractive despite the rising cost inflation, moreover fund flows remain supportive as asset allocation shift away from bonds in favor of equities. Turkish equities outperformed the global equity markets last month mainly on previous oversold condition. Investors started to build back Turkish exposure despite further reserve ratio hikes which will put pressure on profit expectations for 2011, but the strong fundamentals of local economy will drive ex-financial sectors' earnings up, meanwhile high oil price sooner or later may slow down a bit the Turkish economy as well.

### NET YIELD PERFORMANCE OF THE FUND:
