## MAIN DISTRIBUTOR

AEGON Magyarország Befektetési Jegy Forgalmazó Zrt.

## INVESTMENT POLICY OF THE FUND

The AEGON Hungary Fund Management Co. has launched this new derivative investment fund to provide an alternative solution for investors, who are expecting a decline of the share prices on the Polish Stock Market. The Fund offers 90% capital protection by a significant share of Polish Treasury Notes. In case of declining share prices the Fund ensures by its WIG20 put option exposure that the investor will get an extra return on his investment. If the fund manager expects that the stock market will go up then he reduces the options position, but if he sees higher risk in the stock market then he will buy more put options for the WIG20 index. Since the capital protection allows the fund manager to buy only a limited amount of put options, the maximum short exposure of the fund is 50% of the fund's net asset value. Since the fund is a dedicated bearish fund, it intends to keep the WIG20 short exposure above 25% of net asset value.

Total investment assets	100.00%
Net corrected leverage	121.26%
Derivative products	21.32%

## MARKET SUMMARY

The Fund has lost 0.86% on the back of the equity rally. The Arabian political instability and Japanese earthquake increase risk aversion temporarily on the capital market, but cannot change the direction of the market which is well supported by the improving economical activity. We wait further improvement of profitability on the back of the QE2 and zero interest rates policy in the world. The increasing commodity and energy prices may harm the profitability, but it seems to us that companies can tolerate and adapt to this external shocks. This healthy recovery boost GDP growth and inflation expectations, but weak polish zloty cannot anchor the expectations on the long run. The NBP reacts to this process with rate-hiking to avoid inflation spiral. That's why we keep our defensive money market portfolio.

## NET YIELD PERFORMANCE OF THE FUND
