INVESTMENT POLICY OF THE FUND:

The AEGON Hungary Fund Management Co. created Hungary's first EUR denominated total return fund, the AEGON EuroExpress Fund. The fund acts as "long-only", so it can only take long positions. It is not allowed to take uncovered short positions to profit from the dropping prices. We launched this fund because a lot of our clients said that they don't feel experienced enough in the field of investment, so it is difficult for them to decide in which fund they should invest. The constantly changing market situation causes a big dilemma for the investors, bringing to mind questions of when and how they should re-allocate their portfolio. The AEGON EuroExpress Fund resolves these questions and it takes the responsibility for making the right investment decision for private investors, who can handle low/moderate risk and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest in any type of Hungarian/International bond or equity as well as in Hungarian/International currencies. The fund manager's financial leeway is very wide, even while paying maximal attention to legal compliance. The aim of the fund is to provide its investors with a good yield at low/moderate volatility. In other words, the Fund targets a high Sharpe-ratio. The Fund's benchmark is the base rate of the ECB (European Central Bank) which is effective on the first trading day of the year. The fund manager is allowed to hedge the foreign exchange risk entirely or partly by using currency futures. The Fund offers an excellent opportunity for investors who wish to invest on a euro basis, and would like to achieve much higher returns than the euro denominated bank deposits can offer, while the level of risk is moderately low.

INVESTMENT HORIZON:

Suggested minimum investment period:

Receivables	0,19 %
Market value of open derivative positions	0,13 %
total	100,00 %
Derivative products	9,40 %
Net corrected leverage	99,88 %

MARKET SUMMARY:

The announcement of the second Greek package and the last minute agreement on raising the US debt ceiling could only calm markets for a short period, negative sentiment weighed on markets particularly in the second half of the month, which was also justified by weaker macro data.

Bond spreads widened accordingly. Bulk of the bonds we keep in the portfolio are short maturity and low volatility instruments, but widening spreads in the lower weighted higher risk instruments affected our performance negatively.

We only did defensive trades during the month. We placed short term euro deposit at a local bank and exploited the widening eur-huf basis to buy hedged short term huf assets.

Performance of the fund beat the benchmark in July, but produced a negative 8 bp absolute performance.

NET YIELD PERFORMANCE OF THE FUND:

Time horizon	12 months	2010 year	2009 year	2008 year
Investment note	1,70 %	1,45 %	10,85 %	-16,05 %
Net benchmark	-1,54 %	-1,54 %	0,06 %	1,18 %
