Start:	2007.12.11
Currency:	EUR
Total Net Asset Value of the Fund:	1,504,901 EUR
Net Asset Value per unit:	0.949991 EUR

INVESTMENT POLICY OF THE FUND:

The AEGON Hungary Fund Management Co. created Hungary's first EUR denominated total return fund, the AEGON EuroExpress Fund. The fund acts as "long-only", so it can only take long positions. It is not allowed to take uncovered short positions to profit from the dropping prices. We launched this fund because a lot of our clients said that they don't feel experienced enough in the field of investment, so it is difficult for them to decide in which fund they should invest. The constantly changing market situation causes a big dilemma for the investors, bringing to mind questions of when and how they should re-allocate their portfolio. The AEGON EuroExpress Fund resolves these questions and it takes the responsibility for making the right investment decision for private investors, who can handle low/moderate risk and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest in any type of Hungarian/International bond or equity as well as in Hungarian/International currencies. The fund manager's financial leeway is very wide, even while paying maximal attention to legal compliance. The aim of the fund is to provide its investors with a good yield at low/moderate volatility. In other words, the Fund targets a high Sharpe-ratio. The Fund's benchmark is the base rate of the ECB (European Central Bank) which is effective on the first trading day of the year. The fund manager is allowed to hedge the foreign exchange risk entirely or partly by using currency futures. The Fund offers an excellent opportunity for investors who wish to invest on a euro basis, and would like to achieve much higher returns than the euro denominated bank deposits can offer, while the level of risk is moderately low.

MARKET SUMMARY:

Global capital markets were dominated by pessimistic sentiment, collapsing equity markets, rising credit spreads all reflected a significant deterioration of growth outlook. Eurozone crisis is still with us, the reactivated periphery bond buying program of the ECB is only emergency solution. Debates surrounding the US debt ceiling deal and the proposed financial transaction levy only deepened the confidence crisis. The IMF opinion on capital raising needs of European banks did not help either. Due to deteriorating sentiment money started to flow out of risky products generating additional sales - except from EM local currency bond funds where the money flees from continuously devalued hard currencies. Risk premium revaluation is ongoing in the credit space: high grade spreads doubled, banks spreads - at least in Europe - are higher than in 2008, and riskier corporate spreads are also significantly higher. This was partly compensated by the fall in core yields that hit all-time lows. We rolled over or position exploiting the wide EURHUF basis. We only have a few risky positions in the fund but the spread widening on those few deteriorated our performance significantly. The fund underperformed the benchmark by 9 bps. The fund's investment policy will be changed in September.

ASSET ALLOCATION OF THE FUND ON 08/31/2011
