Currency:	HUF
Total Net Asset Value of the Fund:	3,353,161,804 HUF
Net Asset Value per unit:	1.936135 HUF

INVESTMENT POLICY OF THE FUND:

The AEGON IstanBull Equity Fund primarily targets the stock exchange-traded shares of companies that maintain an active presence in Turkey, or generate a substantial proportion of their revenues in the Turkish market. The Fund predominantly invests in equities, but its portfolio also contains bonds and discount treasury bills, currencies and money-market products, to ensure the Fund's liquidity. The equity investments are usually denominated in foreign currency; however the fund may hedge some or all of the currency risk arising from these liabilities by concluding forward or option transactions. Although the Turkish market promises a high potential return, the value of investments may display a marked degree of fluctuation in the short term, and therefore it is advisable to treat the Fund as a long-term investment. The Fund Management primarily bases its investment decisions on its own fundamental analyses, but it also makes use of the information and analyses provided by other investment service providers, banks and independent research companies, in the interests of reducing risks and maximising returns. The fund's benchmark: 95% TR20I Index + 5% ZMAX Index.

MARKET SUMMARY:

Equity market returns were negative in September as investors continued to reduce risk - paring back equity and commodity positions. A lack of confidence about the ability and willingness of policy-makers to support asset markets and the economy continued to weigh on equity sentiment.

EM equities declined 14.8% in September, more than doubling the losses of DM equities (-6.7%). Traditional drivers of EM equity performance were weak: the USD (+6.3%) surged while commodity prices collapsed (-3.0%). Copper plummeted 21.5% as Brent crude oil declined 10.4%. Even gold took a beating, falling 11.1%. Turkish equities continued its outperformance gaining 11.04% in local currency and 20.60% in HUF.
