Total Net Asset Value of the Fund:	1,970,087,891 HUF
Net Asset Value per unit:	1.053482 HUF

INVESTMENT POLICY OF THE FUND:

We launched the AEGON Asia Equity Fund of Funds so that our customers could profit from the Asian growth. The persistent profit growth of Asian companies, the regions richness in liquidity and the appreciation of the Asian currencies are the key to the strong economic growth of the region, a growth that will probably be much higher in the years to come than the European or American one. According to our opinion the long-term structural development secures the sustainable above-average growth. Dissimilar to the previous economic cycles, the region is less vulnerable because of its big foreign-exchange holdings and low indebtedness. The developing internal demand and high liquidity could compensate a potential slowdown in the American economy. Most of the Asian equities offer high dividend yields and the valuation level of the companies is low compared with other regions. Certainly it is important to invest in such markets that have adequate valuation levels. Our investment decisions are supported by a special investment-planning model, which builds on all the important macro economical indicators and the companies' evaluation indicators. 75% MSCI AC Far East ex Japan + 15% MSCI India + 5% MSCI Japan + 5% ZMAX Index is the composite benchmark index of the Fund. The Fund's main goal is to overperform its benchmark by a minimum of 2%.

MARKET SUMMARY:

Asian equities remained under pressure for most part of November as periphery jitters weighed on the market. Only the last day of November saw an upward correction as major central banks announced a joint action of easing USD liquidity conditions, which sparked an enormous relief rally in equities. Despite the month-end rally, in USD terms Asian equities underperformed MSCI World Index falling by 8.4% and 2.7% respectively. Worst performers equity indices in Indian, and Hong-Kong loosing 15% and 9.6%, while outperformers were the South Korean and Japanese equity markets declining by 5.7% and 4.2%.
