Currency:	HUF
Total Net Asset Value of the Fund:	9,783,917,160 HUF
Net Asset Value per unit:	1.916232 HUF

INVESTMENT POLICY OF THE FUND:

Hungary's first total return fund, the AEGON MoneyMaxx Expressz Mixed Fund opened introduced a new category to the Hungarian investment fund market. We launched this fund because a lot of our clients pointed out that they don't feel experienced enough in the field of investment, so it is difficult for them to decide in which fund they should invest. The constantly changing market situation imposes a challenge for the investors, raising the questions of when and how they should re-allocate their portfolio. The AEGON MoneyMaxx Expressz Mixed Fund meets these needs, and shoulders the responsibility for making the right investment decision for private investors who want to get familiar with moderate risk and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest in any kind of Hungarian bond or equity, or it can invest in international bonds or equities. The fund manager's financial leeway is very wide – while paying maximal attention to the compliance with the law – meaning, on one hand, 100% of the portfolio can be invested in equities or, on the other hand, the portfolio can contain T-bills up to 100%. We recommend this Fund to investors who are willing to take more risks (in some cases the risk may be similar when investing in equity funds), as well as to investors who prefer their savings constantly managed and transferred from one asset class to another, in accordance with the changing market situation and the anticipation of professional portfolio managers.

MARKET SUMMARY:

Global conditions did not deteriorate further in December, though a significant degree of anxiety remains concerning growth and the sustainability of debt in much of the developed world. This sustained negative sentiment was reflected in stubbornly wide spreads on risky assets, range trading in equities and a weakening of the euro against the US dollar in December. Credit and cash spreads remain wide and issuance activity is dead despite generally healthy corporate balance sheets as global macro woes overshadow the market. Hungarian newsflow was disastrous once again, and the resulting widening of spreads was detrimental to the performance of our fund, though this was offset by the gains on the FX-exposure as EURHUF closed the year near its all time high. Our long only total return fund was able to end this year of extreme market dislocations preserving clients' capital in net terms, which we see as an achievement.

ASSET ALLOCATION OF THE FUND ON 12/31/2011
