Currency:	HUF
Total Net Asset Value of the Fund:	1,783,431,469 HUF
Net Asset Value per unit:	1.071439 HUF

INVESTMENT POLICY OF THE FUND:

We launched the AEGON Asia Equity Fund of Funds so that our customers could profit from the Asian growth. The persistent profit growth of Asian companies, the regions richness in liquidity and the appreciation of the Asian currencies are the key to the strong economic growth of the region, a growth that will probably be much higher in the years to come than the European or American one. According to our opinion the long-term structural development secures the sustainable above-average growth. Dissimilar to the previous economic cycles, the region is less vulnerable because of its big foreign-exchange holdings and low indebtedness. The developing internal demand and high liquidity could compensate a potential slowdown in the American economy. Most of the Asian equities offer high dividend yields and the valuation level of the companies is low compared with other regions. Certainly it is important to invest in such markets that have adequate valuation levels. Our investment decisions are supported by a special investment-planning model, which builds on all the important macro economical indicators and the companies' evaluation indicators. 75% MSCI AC Far East ex Japan + 15% MSCI India + 5% MSCI Japan + 5% ZMAX Index is the composite benchmark index of the Fund. The Fund's main goal is to overperform its benchmark by a minimum of 2%.

MARKET SUMMARY:

Global stock markets remained buoyed throughout February benefiting from the easing liquidity conditions as well a set of solid US macro and corporate earnings data published. The ECB went on to initiate the second phase of its long term refinancing programme (LTRO-2) which lifted European financials and risky assets. The approval of the Greek austerity measures fuelled the rally, so did the easing periphery yields. Stocks in Japan, Hong-Kong and Chinese equities outperformed global average increasing by 5.2%, 5.8%, 6.0% in USD terms, respectively vs 5.0% jump of MSCI World, while Korean and Indian indices lagged behind adding 2.4% and 4.2%.
