 Currency: HUF
 Total Net Asset Value of the Fund: 17,030,926,542 HUF
 Net Asset Value per unit: 4.007044 HUF

INVESTMENT POLICY OF THE FUND:

The Fund invests in equities issued by corporations of the Central European region (primarily Hungary, Poland, The Czech Republic, Romania, Slovenia, Croatia, secondly Austria, Russia, Turkey), but the Fund can also invest in emerging or developed regions' equities and other collective securities as well. The primary aspect in forming the Fund's portfolio is to optimize aggregate exposure of the securities. To minimize risk the fund manager selects the securities to be included in the portfolio with utmost care. Analyses concerning the securities' risk criteria are carried out and decisions are underpinned by thorough calculations. During the selection the liquidity of a given security plays an important role. The fund manager applies widespread diversification to handle the risk each security implies (in the given equity markets risk is further diversified by expanding mid-cap exposure) and periodically uses derivatives for hedging to further minimize risk. To ensure the accurate level of liquidity the Fund intends to hold Hungarian Government securities issued by the Hungarian Public Debt Management Agency and distributed within the framework of the primary government security distribution system. However, according to legal regulation the proportion of equities within the portfolio may be as high as 100%. The Fund's benchmark consist of 95% CECEXEUR Index + 5% ZMAX Index.

MARKET SUMMARY:

Global stock markets remained buoyed throughout February benefiting from the easing liquidity conditions as well a set of solid US macro and corporate earnings data published. The ECB went on to initiate the second phase of its long term refinancing programme (LTRO-2) which lifted European financials and risky assets. The approval of the Greek austerity measures fuelled the rally, so did the easing periphery yields. In February, PX index was the best performer, increasing by 6% in EUR terms, while BUX index and Wig20 index rose 4.4% and 2% respectively. Average daily volumes picked up in Poland and the Czech Republic, while it dropped in Hungary after the strong January. While market was driven by improving liquidity in January, February movement mainly dominated by company specific news flow. In Prague Erste materially outperformed on remarkable Q4 results, and the fact that the bank can easily meet EBA capital criteria's. In Poland domestic consumption driven sectors increased the most, while in Hungary Magyar Telecom rallied on the back of the improving Hungarian bond market. As the market lost its sentiment driven momentum, we switched from high beta to a more defensive strategy and concentrating to stock picking.
