Start:	2007.12.11
Currency:	EUR
Total Net Asset Value of the Fund:	1,028,728 EUR
Net Asset Value per unit:	0.959249 EUR

INVESTMENT POLICY OF THE FUND:

The AEGON Hungary Fund Management Co. created Hungary's first EUR denominated total return fund, the AEGON EuroExpress Fund. The fund acts as "long-only", so it can only take long positions. It is not allowed to take uncovered short positions to profit from the dropping prices. We launched this fund because a lot of our clients said that they don't feel experienced enough in the field of investment, so it is difficult for them to decide in which fund they should invest. The constantly changing market situation causes a big dilemma for the investors, bringing to mind questions of when and how they should re-allocate their portfolio. The AEGON EuroExpress Fund resolves these questions and it takes the responsibility for making the right investment decision for private investors, who can handle low/moderate risk and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest in any type of Hungarian/International bond or equity as well as in Hungarian/International currencies. The fund manager's financial leeway is very wide, even while paying maximal attention to legal compliance. The aim of the fund is to provide its investors with a good yield at low/moderate volatility. In other words, the Fund targets a high Sharpe-ratio. The Fund's benchmark is the base rate of the ECB (European Central Bank) which is effective on the first trading day of the year. The fund manager is allowed to hedge the foreign exchange risk entirely or partly by using currency futures. The Fund offers an excellent opportunity for investors who wish to invest on a euro basis, and would like to achieve much higher returns than the euro denominated bank deposits can offer, while the level of risk is moderately low.

 high

MARKET SUMMARY:

The global risk rally came to a halt, weaker PMI figures all over the world and renewed fears about a Chinese hard landing weighed on market sentiment. Still, EM credit markets remained well-bid, although a rise in core rates earlier in March did not help the positive price action to continue. Spreads in the EM space corrected to early March levels, 20-30bps higher than this year's lows mid-March. Short yields remain extremely low, although we hope that a fading LTRO effect will open up opportunities to put some of our high cash position to work again. The fund outperformed the benchmark by 13 bps.

ASSET ALLOCATION OF THE FUND ON 03/31/2012
