INVESTMENT POLICY OF THE FUND:

The AEGON IstanBull Equity Fund primarily targets the stock exchange-traded shares of companies that maintain an active presence in Turkey, or generate a substantial proportion of their revenues in the Turkish market. The Fund predominantly invests in equities, but its portfolio also contains bonds and discount treasury bills, currencies and money-market products, to ensure the Fund's liquidity. The equity investments are usually denominated in foreign currency; however the fund may hedge some or all of the currency risk arising from these liabilities by concluding forward or option transactions. Although the Turkish market promises a high potential return, the value of investments may display a marked degree of fluctuation in the short term, and therefore it is advisable to treat the Fund as a long-term investment. The Fund Management primarily bases its investment decisions on its own fundamental analyses, but it also makes use of the information and analyses provided by other investment service providers, banks and independent research companies, in the interests of reducing risks and maximising returns. The fund's benchmark: 95% TR20I Index + 5% ZMAX Index.

MARKET SUMMARY:

The low-volatility upward momentum somewhat deteriorated in March as most of the equity markets struggled to appreciate further, yet became more volatile compared to the previous 2 months. China slashed its 2012 GDP growth target to 7.5% from 8.0%, which is still a solid figure, but sparked a selloff in raw material linked equities. Brent crude prices advanced above the USD 120/bbl level, surpassing the 2011 Spring highs due to the Iranian standoff and a Total offshore gas platform accident at the North Sea, which may lead to further offshore safety measures and additional production cost increases. Despite high oil prices, mainly on improving growth outlook of Turkish economy in 2012, Turkish equities outperformed both developed and emerging equity markets in March. DJ Turkey Titans 20 Index increased by 3.8%, MSCI World's gain was 2.8% while MSCI Emerging Market Index declined by 0.5%, all in HUF terms.
