Currency:	HUF
Total Net Asset Value of the Fund:	1,705,186,526 HUF
Net Asset Value per unit:	1.051089 HUF

INVESTMENT POLICY OF THE FUND:

We launched the AEGON Asia Equity Fund of Funds so that our customers could profit from the Asian growth. The persistent profit growth of Asian companies, the regions richness in liquidity and the appreciation of the Asian currencies are the key to the strong economic growth of the region, a growth that will probably be much higher in the years to come than the European or American one. According to our opinion the long-term structural development secures the sustainable above-average growth. Dissimilar to the previous economic cycles, the region is less vulnerable because of its big foreign-exchange holdings and low indebtedness. The developing internal demand and high liquidity could compensate a potential slowdown in the American economy. Most of the Asian equities offer high dividend yields and the valuation level of the companies is low compared with other regions. Certainly it is important to invest in such markets that have adequate valuation levels. Our investment decisions are supported by a special investment-planning model, which builds on all the important macro economical indicators and the companies' evaluation indicators. 75% MSCI AC Far East ex Japan + 15% MSCI India + 5% MSCI Japan + 5% ZMAX Index is the composite benchmark index of the Fund. The Fund's main goal is to overperform its benchmark by a minimum of 2%.

MARKET SUMMARY:

Major equity indices eased for the most part of April as slowdown worries weighed on the market. Several key macro data published in April showed some sign of deterioration in growth prospects. However, the US corporate earnings season once again delivered a positive message with two thirds of the reporting companies surpassing analyst expectations on the net profit level. The bleak EU macro outlook was represented in the underperformance of the European markets as well, while the S&P 500 remained relatively resilient to the market correction in April. Asian stocks except Indian (-5.5% in HUF) and Japan markets (-5.1% in HUF) over performed the global equity markets (-3.2% in HUF), mainly thanks to the favorable Chinese outlook compared to the last months. Lately Chinese outlook became slightly better, therefore Asian and Chinese equities may continue to over perform in the near future.
