INVESTMENT POLICY OF THE FUND:

The AEGON Hungary Fund Management Co. created Hungary's first EUR denominated total return fund, the AEGON EuroExpress Fund. The fund acts as "long-only", so it can only take long positions. It is not allowed to take uncovered short positions to profit from the dropping prices. We launched this fund because a lot of our clients said that they don't feel experienced enough in the field of investment, so it is difficult for them to decide in which fund they should invest. The constantly changing market situation causes a big dilemma for the investors, bringing to mind questions of when and how they should re-allocate their portfolio. The AEGON EuroExpress Fund resolves these questions and it takes the responsibility for making the right investment decision for private investors, who can handle low/moderate risk and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest in any type of Hungarian/International bond or equity as well as in Hungarian/International currencies. The fund manager's financial leeway is very wide, even while paying maximal attention to legal compliance. The aim of the fund is to provide its investors with a good yield at low/moderate volatility. In other words, the Fund targets a high Sharpe-ratio. The Fund's benchmark is the base rate of the ECB (European Central Bank) which is effective on the first trading day of the year. The fund manager is allowed to hedge the foreign exchange risk entirely or partly by using currency futures. The Fund offers an excellent opportunity for investors who wish to invest on a euro basis, and would like to achieve much higher returns than the euro denominated bank deposits can offer, while the level of risk is moderately low.

MARKET SUMMARY:

International markets continued to weaken in April. Macro dataflow confirmed declining economic activity while tensions in the Eurozone resurfaced again (Spain came into spotlight) which was mirrored in rising periphery bond spreads while Bund yields hit new lows on safe haven buying. EM cash bond markets remained quite resilient though, helped by continuous inflows into funds. The fund produced an outperformance of 26 bps which was based mainly on the Hungarian assets rally after the government settled its dispute with the European Commission.
