Currency:	HUF
Total Net Asset Value of the Fund:	9,937,209,251 HUF
Net Asset Value per unit:	2.048232 HUF

INVESTMENT POLICY OF THE FUND:

Hungary's first total return fund, the AEGON MoneyMaxx Expressz Mixed Fund opened introduced a new category to the Hungarian investment fund market. We launched this fund because a lot of our clients pointed out that they don't feel experienced enough in the field of investment, so it is difficult for them to decide in which fund they should invest. The constantly changing market situation imposes a challenge for the investors, raising the questions of when and how they should re-allocate their portfolio. The AEGON MoneyMaxx Expressz Mixed Fund meets these needs, and shoulders the responsibility for making the right investment decision for private investors who want to get familiar with moderate risk and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest in any kind of Hungarian bond or equity, or it can invest in international bonds or equities. The fund manager's financial leeway is very wide – while paying maximal attention to the compliance with the law – meaning, on one hand, 100% of the portfolio can be invested in equities or, on the other hand, the portfolio can contain T-bills up to 100%. We recommend this Fund to investors who are willing to take more risks (in some cases the risk may be similar when investing in equity funds), as well as to investors who prefer their savings constantly managed and transferred from one asset class to another, in accordance with the changing market situation and the anticipation of professional portfolio managers.

MARKET SUMMARY:

April saw continued uncertainty in equity markets due to poor incoming macro data, and renewed concerns about the sustainability of Spain's debt given the weak performance of the economy. In addition, risks of political destabilisation in most euro zone countries as a consequence of the ongoing fiscal austerity came into the market's focus. We increased the fund's risk exposure during the month. In particular, we added Hungarian government bonds and eliminated any exchange rate risk from the fund using short EURHUF forwards. The Hungarian assets reacted very positively to the April 25 announcement of the European Commission which gave the green light for official talks between the Hungarian government and the IMF on a financial support programme. As a result the fund posted a gain of 77 basis points over the money market index.
