## INVESTMENT POLICY OF THE FUND:

The Fund invests primarily in public companies listed on the main stock exchanges in the developed world. The primary investment targets are companies that benefit from global climate change (Clean Tech, Energy efficiency, Environmental management), utilize alternative energies (renewable energy, water) or are involved in the agribusiness (agricultural commodity producer, livestock and aquaculture producers, producers of agrochemicals, bio-fuel industry). To manage risk, the Fund Manager invests in listed equities with investment grade and focuses on diversification of the portfolio. The Fund is denominated in Euros. The Fund manager – according to the law – can partly or fully hedge the foreign exchange position.

## MARKET SUMMARY:

Equities remained under pressure throughout May. The correction was fuelled by softening macro data published across the globe as well as a new set of European periphery yield jitters. Greece failed to form a new government following the political standoff of the parliamentary election held in May, which added to the cautious stance towards equities. Most of the major equity indices gave back the outstanding Q1 performance. Climate Change related equities did not manage to be exempt from the correction, while crude oil was sold off due to the softer tone of the Iranian negotiations as well as the ongoing macro concerns.
