Currency:	HUF
Total Net Asset Value of the Fund:	9,822,614,789 HUF
Net Asset Value per unit:	2.026151 HUF

## INVESTMENT POLICY OF THE FUND:

Hungary's first total return fund, the AEGON MoneyMaxx Expressz Mixed Fund opened introduced a new category to the Hungarian investment fund market. We launched this fund because a lot of our clients pointed out that they don't feel experienced enough in the field of investment, so it is difficult for them to decide in which fund they should invest. The constantly changing market situation imposes a challenge for the investors, raising the questions of when and how they should re-allocate their portfolio. The AEGON MoneyMaxx Expressz Mixed Fund meets these needs, and shoulders the responsibility for making the right investment decision for private investors who want to get familiar with moderate risk and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest in any kind of Hungarian bond or equity, or it can invest in international bonds or equities. The fund manager's financial leeway is very wide – while paying maximal attention to the compliance with the law – meaning, on one hand, 100% of the portfolio can be invested in equities or, on the other hand, the portfolio can contain T-bills up to 100%. We recommend this Fund to investors who are willing to take more risks (in some cases the risk may be similar when investing in equity funds), as well as to investors who prefer their savings constantly managed and transferred from one asset class to another, in accordance with the changing market situation and the anticipation of professional portfolio managers.

## MARKET SUMMARY:

May saw an escalation of negative market sentiment, reflected in a massive drop in EURUSD and global equity indexes. Fears of a global financial market collapse were fuelled by the perception that the euro area is not prepared to deal with a Greek exit. Growth and banking sector issues in Spain intensified existing worries over a euro zone breakup. Risks of a global recession increased, which drove oil prices sharply lower. While domestic newsflow was relatively insignificant or even slightly positive, the Hungarian CDS printed a 6-month high and EURHUF weakened by 5%. While we entered this market turmoil with a low risk exposure in the fund, we still lost some of the performance added in previous months on our EUR-denominated debt instruments. Our tactical attempts to add risk at distressed levels in a did not pay off this month completely.
