Currency:	HUF
Total Net Asset Value of the Fund:	1,016,526,454 HUF
Net Asset Value per unit:	1.383495 HUF

## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to give a capital-protected alternative investment opportunity which should enable clients to achieve excess return without great risk to their capital. The structure of the fund gives capital protection. At the beginning of every year, the Fund buys T-bills and keeps cash in repos and deposits, which should cover the capital protection. The remaining part of the money is invested opportunistically in various options. The options are actively traded in a range of markets (FX, equities and futures). Since the options can only be bought and sold but never written, this cannot result in a big loss, so that the capital protection can never get in danger. The capital protection means that on the first workday of every year the NAVPU of the Fund cannot be less than it was on the first workday of the previous year. The investor, who buys the Fund any time during the year, can be sure that on the first day of the next year the Fund's NAVPU will be at least as much as on the first day of the year in which he purchased the fund. However, during the year, the Fund's NAVPU can vary widely. While most option and T-bill based funds buy the options and keep them until expiry, we actively manage the portfolio, so the success, or return, of the Fund is based on whether the Fund Manager's expectations turn out to be right.

## MARKET SUMMARY:

Equities remained under pressure throughout May. The correction was fuelled by softening macro data published across the globe as well as a new set of European periphery yield jitters. Greece failed to form a new government following the political standoff of the parliamentary election held in May, which added to the cautious stance towards equities. Most of the major equity indices gave back the outstanding Q1 performance. European markets kept underperforming US equities, while the Euro was hit to 2-year low against the US Dollar as the periphery turmoil weighed on the markets. Crude oil was sold off due to the softer tone of the Iranian negotiations as well as the ongoing macro concerns. The fund closed the month in red as the selective equity bets caused some underperformance again. Nevertheless we cut back the risky exposure significantly, the fund only contains very selective, defensive names with very low weights.

## ASSET ALLOCATION OF THE FUND ON 05/31/2012
