Net Asset Value of PLN series:	15,802,887 PLN
Net Asset Value per unit:	1.123032 PLN

INVESTMENT POLICY OF THE FUND:

The AEGON IstanBull Equity Fund primarily targets the stock exchange-traded shares of companies that maintain an active presence in Turkey, or generate a substantial proportion of their revenues in the Turkish market. The Fund predominantly invests in equities, but its portfolio also contains bonds and discount treasury bills, currencies and money-market products, to ensure the Fund's liquidity. The equity investments are usually denominated in foreign currency; however the fund may hedge some or all of the currency risk arising from these liabilities by concluding forward or option transactions. Although the Turkish market promises a high potential return, the value of investments may display a marked degree of fluctuation in the short term, and therefore it is advisable to treat the Fund as a long-term investment. The Fund Management primarily bases its investment decisions on its own fundamental analyses, but it also makes use of the information and analyses provided by other investment service providers, banks and independent research companies, in the interests of reducing risks and maximising returns. The fund's benchmark: 95% TR20I Index + 5% ZMAX Index.

MARKET SUMMARY:

Equity markets went through substantial swings and moderate appreciation in July. PMI indices kept deteriorating, particularly manufacturing activity had been bleak retreating to levels not seen since Q2 2009. The US corporate earnings season started with rather mixed results, but kept improving throughout July, delivering an overall positive earnings surprise both on the net profit and revenues level. However, the key focus had been on debt concerns and liquidity conditions as periphery yields once again skyrocketed. Equities staged a substantial rally as ECB President Mario Draghi made supportive comments about the eurozone, however, the announcement lacked details. Crude oil recovered following the huge correction in June, helped by both the civil war in Syria and the very low level of the Middle East premium in WTI prices. After the excellent performance of June, Turkish market managed to outperform EM average again. The Turkish benchmark index gained by 7% in EUR terms, best performers were Turkcell and Isbank. Turkey is one of the most appealing market this year as inflation slowed, current account deficit narrowed in seven consecutive month and - as a result - Moody's upgraded the country last month.

ASSET ALLOCATION OF THE FUND ON 07/31/2012

Asset type	Weight
International equities	95.65 %
Liabilities	-6.16 %
Receivables	6.06 %
Current account	4.26 %
