Total Net Asset Value of the whole Fund:	1,541,723,205 HUF
Net Asset Value of EUR series:	134,839 EUR
Net Asset Value per unit:	0.902255 EUR

INVESTMENT POLICY OF THE FUND:

We launched the AEGON Asia Equity Fund of Funds so that our customers could profit from the Asian growth. The persistent profit growth of Asian companies, the regions richness in liquidity and the appreciation of the Asian currencies are the key to the strong economic growth of the region, a growth that will probably be much higher in the years to come than the European or American one. According to our opinion the long-term structural development secures the sustainable above-average growth. Dissimilar to the previous economic cycles, the region is less vulnerable because of its big foreign-exchange holdings and low indebtedness. The developing internal demand and high liquidity could compensate a potential slowdown in the American economy. Most of the Asian equities offer high dividend yields and the valuation level of the companies is low compared with other regions. Certainly it is important to invest in such markets that have adequate valuation levels. Our investment decisions are supported by a special investment-planning model, which builds on all the important macro economical indicators and the companies' evaluation indicators. 75% MSCI AC Far East ex Japan + 15% MSCI India + 5% MSCI Japan + 5% ZMAX Index is the composite benchmark index of the Fund. The Fund's main goal is to overperform its benchmark by a minimum of 2%.

MARKET SUMMARY:

In August, after the initial rise, the markets stagnated close to the peaks of March. The global macro picture shows a slowdown henceforward. The expectations concerning the introduction of the next QE as well as the bond-buying program intensified in August. At the end of the month Ben Bernanke emphasized the necessity of the QE, but he did not mention any specific measures, in spite of this the markets reacted positively. The price of precious metal rose during the month. Due to the unsolved exploitation at the North Sea, we saw a sharp Brent oil price correction, however the raw materials linked equities did not follow it. Most of the Asian stocks ended higher this month, although the gloomy outlook on China's economy held back Chinese indices. The Chinese market underperformed the stagnant MSCI Asia Index by 5 ppt during the month. On the last day of August Bernanke made a speech which had a positive effect on the Asian stock markets as well, despite the fact that Chinese manufacturing data were below expectations.

ASSET ALLOCATION OF THE FUND ON 08/31/2012
