INVESTMENT POLICY OF THE FUND:

Hungary's first total return fund, the AEGON MoneyMaxx Expressz Mixed Fund opened introduced a new category to the Hungarian investment fund market. We launched this fund because a lot of our clients pointed out that they don't feel experienced enough in the field of investment, so it is difficult for them to decide in which fund they should invest. The constantly changing market situation imposes a challenge for the investors, raising the questions of when and how they should re-allocate their portfolio. The AEGON MoneyMaxx Expressz Mixed Fund meets these needs, and shoulders the responsibility for making the right investment decision for private investors who want to get familiar with moderate risk and who are not too risk-averse. According to the opinion of the fund manager, our Fund is allowed to invest in any kind of Hungarian bond or equity, or it can invest in international bonds or equities. The fund manager's financial leeway is very wide – while paying maximal attention to the compliance with the law – meaning, on one hand, 100% of the portfolio can be invested in equities or, on the other hand, the portfolio can contain T-bills up to 100%. We recommend this Fund to investors who are willing to take more risks (in some cases the risk may be similar when investing in equity funds), as well as to investors who prefer their savings constantly managed and transferred from one asset class to another, in accordance with the changing market situation and the anticipation of professional portfolio managers.

MARKET SUMMARY:

Risk markets moved higher on a dearth of negative news compared to previous months. The price action was similar to that in the first two months of the year as indices advanced in a relatively narrow channel, which also encouraged carry investors looking to make money on instruments paying a higher interest rate. This was reflected in an appreciation of European corporate and bank instruments as well as periphery government paper. Given the absence of local news, the calm global environment was major factor contributing to the relative strength of the HUF, too. Thanks to the aforementioned factors our fund gained performance in a consistent manner throughout the month.
