MARKET SUMMARY:

Regardless of the dismal macro environment, equity markets soared to multi-year highs in September. The rally was fuelled by an exceptionally strong set of stimulus: the BOJ announced further monetary easing, while the FED launched an open-ended MBS purchasing programme as well as keeping interest rates near zero as long as 2015. The ECB announced its bond purchasing programme, which boosted investor sentiment and drove down periphery yields. China initiated a new set of infrastructural programme, even though way less substantial than its predecessor introduced in 2009, still led to a surge in raw material linked equities. The USD kept declining on the news of monetary easing, while precious metals staged a massive rally in September. The fund kept neutral equity weight in September, while its selective cyclical positions benefitted from the risk-on environment.
