INVESTMENT POLICY OF THE FUND:

Goal of the fund is to achieve higher return on EUR denominated savings than bank deposits. The fund has a broad money market mandate that mixes the EM expertise of the fund manager with the safety of traditional money market funds. The fund invests the bulk of its assets on fixed income markets and is not allowed to buy equities. Short term EUR denominated sovereign and corporate bonds represent the investment focus of the fund. The fund manager keeps total duration of the fund low to achieve low volatility, it can not be higher than one year. The fund purchases standard money market instruments but also exploits opportunities on the corporate and covered bond markets to achieve excess return. Quality is paramount: non-investment grade issues are exempt from the investment universe. This is a long-only fund with no leverage allowed.

MARKET SUMMARY:

Credit markets closed a good month as US data surprised on the upside and European data came in disappointing. First half of the month brought strong performance which was followed by diminishing market momentum later. Significant monetary/economic events and announcements did not arrive, market movements were mostly generated by incoming data. The naked CDS ban on EU sovereigns valid from 1 November could have acted as a supporting technical factor as investors closed open positions, bringing CDS and bond yields down. Hungarian CDS also decreased significantly despite any good news about IMF negotiations. We reinvested maturities with focusing on safety, the low EUR yield environment remains challenging.
