Net Asset Value of HUF series:	9,384,165,655 HUF
Net Asset Value per unit:	2.065049 HUF

INVESTMENT POLICY OF THE FUND:

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this, the fund is only allowed to hold very safe investments, like T-bills and Hungarian government bonds with durations lower than two year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than half year, the volatility of the fund is also very low. It is much lower than the volatility of a bond fund, which can contain longer government bonds. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills.

MARKET SUMMARY:

The monetary easing cycle continued in October with another 25 bps rate cut at the end of the month. External members of the Monetary Council do not see mid-term inflation risks despite the current extremely high (6,6%) headline inflation as this was mainly caused by one-off effects, and with these effects fading with time they think inflation can fall back to target. The market looks content with the rate cuts so far: HUF remained stable, bond yields remain low although some steepening could be witnessed in the second part of the month. Tbill yields are at one-year lows, below 6% on the secondary market for all maturities, although the cash market does not price as aggressive rate cuts as the FRA curve. The market currently accepts - amid apparently renewed tensions with the IMF - that the base rate can go lower even without a deal. The council will be cautious; path of easing will highly depend on the global environment.

ASSET ALLOCATION OF THE FUND ON 10/31/2012
