Total Net Asset Value of the whole Fund:	1,555,076,911 HUF
Net Asset Value of EUR series:	153,024 EUR
Net Asset Value per unit:	0.966561 EUR

INVESTMENT POLICY OF THE FUND:

We launched the AEGON Asia Equity Fund of Funds so that our customers could profit from the Asian growth. The persistent profit growth of Asian companies, the regions richness in liquidity and the appreciation of the Asian currencies are the key to the strong economic growth of the region, a growth that will probably be much higher in the years to come than the European or American one. According to our opinion the long-term structural development secures the sustainable above-average growth. Dissimilar to the previous economic cycles, the region is less vulnerable because of its big foreign-exchange holdings and low indebtedness. The developing internal demand and high liquidity could compensate a potential slowdown in the American economy. Most of the Asian equities offer high dividend yields and the valuation level of the companies is low compared with other regions. Certainly it is important to invest in such markets that have adequate valuation levels. Our investment decisions are supported by a special investment-planning model, which builds on all the important macro economical indicators and the companies' evaluation indicators. 75% MSCI AC Far East ex Japan + 15% MSCI India + 5% MSCI Japan + 5% ZMAX Index is the composite benchmark index of the Fund. The Fund's main goal is to outperform its benchmark by a minimum of 2%.

MARKET SUMMARY:

The leading equity indices soared to multi-year highs in December and the American equity market underperformed due to the unsolved fiscal cliff, but on the last day of December an agreement was made in order to avoid it. In December global business conditions kept on improving and the Chinese macro data were better than the expectations as well, thanks to which the probability of hard landing fell further during last months. The euro zone is still weak and the Purchasing Manager Index was below expectations.

During December we invested in local Chinese stocks as we see the local equity market very attractive in view of valuation. The new Chinese leadership emphasized that the main policy goal is urbanization, which could boost the economic growth. The reforms are expected to have a positive effect on the equity market, however, their announcement is only due in the second half of 2013. In Japan, in the middle of December there was a change of government and the new prime minister is expected to weaken the yen. The investors reacted positively on this news and the Japanese equity market rose by 10%.
