Net Asset Value of HUF series:	8,876,749,379 HUF
Net Asset Value per unit:	4.360183 HUF

INVESTMENT POLICY OF THE FUND:

The Fund invests in equities issued by corporations of the Central European region (primarily Hungary, Poland, The Czech Republic, Romania, Slovenia, Croatia, secondly Austria, Russia, Turkey), but the Fund can also invest in emerging or developed regions' equities and other collective securities as well. The primary aspect in forming the Fund's portfolio is to optimize aggregate exposure of the securities. To minimize risk the fund manager selects the securities to be included in the portfolio with utmost care. Analyses concerning the securities' risk criteria are carried out and decisions are underpinned by thorough calculations. During the selection the liquidity of a given security plays an important role. The fund manager applies widespread diversification to handle the risk each security implies (in the given equity markets risk is further diversified by expanding mid-cap exposure) and periodically uses derivatives for hedging to further minimize risk. To ensure the accurate level of liquidity the Fund intends to hold Hungarian Government securities issued by the Hungarian Public Debt Management Agency and distributed within the framework of the primary government security distribution system. However, according to legal regulation the proportion of equities within the portfolio may be as high as 100%. The Fund's benchmark consist of 95% CECEXEUR Index + 5% ZMAX Index.

MARKET SUMMARY:

The leading equity indices soared to multi-year highs in December and the American equity market underperformed due to the unsolved fiscal cliff, but on the last day of December an agreement was made in order to avoid it. In December global business conditions kept on improving and the Chinese macro data were better than the expectations as well, thanks to which the probability of hard landing fell further during last months. The euro zone is still weak and the Purchasing Manager Index was below expectations.

In December the Polish (11,07%) and the Czech (8,19%) market rose, while BUX index dropped 0,5% in HUF terms. In Hungary Richter rose by 2%, while Egis gained 4,7% due to the fact that the government announced to raise the drug budget compared to what had been planned and ensures the R&D tax deduction from the 20% tax. MOL fell by 3,3% in December reacting to the news that the government plans to re-nationalize E.ON's gas storage assets and cut residential gas and electricity prices by 10% from 1 January 2013. In the Polish equity market the raw material related stocks with high beta performed well, while the utility and the telecom sector was lagging behind.
