Total Net Asset Value of the whole Fund:	426,301,638 HUF
Net Asset Value of institutional series:	38,341 PLN
Net Asset Value per unit:	1.044769 PLN

INVESTMENT POLICY OF THE FUND:

The Polish Bond Fund has been started (previously called AEGON EMMA) with the investment aim to give investors' the opportunity to invest primary into the Polish government bond market. By choosing a security one of the important factors is that the security should be liquid. Thanks to the professional diversification and the active portfolio management the Polish Bond Fund provides its investors with a low-medium risk - paired with stable yield investment alternative. The investment possibilities of the Fund are very wide, so the portfolio manager has a widespread financial leeway to build up an optimal portfolio. We target the utmost yield by taking the lowest risk. By taking investment decisions we use fundamental and technical analysis, and we certainly keep an eye on the market sentiment as well. Our investment decisions are supported by a special investment-planning model, which is filled up with all the important macroeconomical data and indicators, like the anticipated level of inflation in Poland, GDP growth, its credit ratings and so on. The portfolio manager generates a so-called risk - yield map, by focusing on the anticipated macroeconomic environment, the anticipated yield curve, and the above-mentioned model. When the map is ready, those risk-yield pairs will be chosen out which are considered to be safe and offer relative high yield at the same time. The Fund's benchmark consists of 100% Treasury BondSpot Poland Index.

MARKET SUMMARY:

Polish bonds were again on fire in November after the central bank finally delivered a long-awaited 25bps rate cut. Incoming macro data made it clear that the Polish economy indeed entered a period of slowdown. The delay in easing from the NBP reinforced the view that monetary policy in Poland tends to react to available real-time data as opposed to pursuing a forward-looking strategy. With the Polish yield curve below 4% at almost every maturity we see little value in Polish bonds.

ASSET ALLOCATION OF THE FUND ON 11/30/2012
