INVESTMENT POLICY OF THE FUND:

The Fund invests primarily in public companies listed on the main stock exchanges in the developed world. The primary investment targets are companies that benefit from global climate change (Clean Tech, Energy efficiency, Environmental management), utilize alternative energies (renewable energy, water) or are involved in the agribusiness (agricultural commodity producer, livestock and aquaculture producers, producers of agrochemicals, bio-fuel industry). To manage risk, the Fund Manager invests in listed equities with investment grade and focuses on diversification of the portfolio. The Fund is denominated in Euros. The Fund manager – according to the law – can partly or fully hedge the foreign exchange position.

MARKET SUMMARY:

In March attention was focused on the Cyprian crisis. According to the expectations part of the holdings above 100 000 euro owned by depositors will be frozen, the other part will be converted automatically into bank stocks. The fact that in such a case the depositors might be involved in the share of losses caused uncertainties in the European equity market. During the month the Italian no-win situation was not solved, the attempt to form of the cabinet proved pointless. S&P 500 reached all time high and the DAX index didn't lag much behind its previous peaks either.

The climate change related stocks showed mixed performance during the month. The alternative energy rally starting at the beginning of the year stopped short and at the same time the companies relating to catalyst value chain and the utilities which are invariably under pressure due to the low quota prices were equally low. The waste and water management companies and the agriculture related companies performed well in March.
