Net Asset Value of PLN series:	105,982,017 PLN
Net Asset Value per unit:	1.394300 PLN

INVESTMENT POLICY OF THE FUND:

The AEGON IstanBull Equity Fund primarily targets the stock exchange-traded shares of companies that maintain an active presence in Turkey, or generate a substantial proportion of their revenues in the Turkish market. The Fund predominantly invests in equities, but its portfolio also contains bonds and discount treasury bills, currencies and money-market products, to ensure the Fund's liquidity. The equity investments are usually denominated in foreign currency; however the fund may hedge some or all of the currency risk arising from these liabilities by concluding forward or option transactions. Although the Turkish market promises a high potential return, the value of investments may display a marked degree of fluctuation in the short term, and therefore it is advisable to treat the Fund as a long-term investment. The Fund Management primarily bases its investment decisions on its own fundamental analyses, but it also makes use of the information and analyses provided by other investment service providers, banks and independent research companies, in the interests of reducing risks and maximising returns. The fund's benchmark: 95% TR20I Index + 5% ZMAX Index.

MARKET SUMMARY:

In March attention was focused on the Cyprian crisis. According to the expectations part of the holdings above 100 000 euro owned by depositors will be frozen, the other part will be converted automatically into bank stocks. The fact that in such a case the depositors might be involved in the share of losses caused uncertainties in the European equity market. During the month the Italian no-win situation was not solved, the attempt to form of the cabinet proved pointless. S&P 500 reached all time high and the DAX index didn't lag much behind its previous peaks either.

The Turkish equity market rose by 12,2% in HUF terms and 7,6% in Turkish Lira. The weakening of the forint and the increase of the equity market starting in February had a positive effect on the performance. The special cause of the increase was the upgrade of Turkey. The high global liquidity still has a positive effect on the demand of the Turkish assets, as for this year the Turkish GDP growth is expected to be above the average. The global GDP growth expectation is 2,35%, while in Turkey 4% is expected.

ASSET ALLOCATION OF THE FUND ON 03/31/2013

Asset type	Weight
International equities	98.86 %
Liabilities	-11.83 %
