Net Asset Value of HUF series:	7,982,836,932 HUF
Net Asset Value per unit:	4.139225 HUF

INVESTMENT POLICY OF THE FUND:

The Fund invests in equities issued by corporations of the Central European region (primarily Hungary, Poland, The Czech Republic, Romania, Slovenia, Croatia, secondly Austria, Russia, Turkey), but the Fund can also invest in emerging or developed regions' equities and other collective securities as well. The primary aspect in forming the Fund's portfolio is to optimize aggregate exposure of the securities. To minimize risk the fund manager selects the securities to be included in the portfolio with utmost care. Analyses concerning the securities' risk criteria are carried out and decisions are underpinned by thorough calculations. During the selection the liquidity of a given security plays an important role. The fund manager applies widespread diversification to handle the risk each security implies (in the given equity markets risk is further diversified by expanding mid-cap exposure) and periodically uses derivatives for hedging to further minimize risk. To ensure the accurate level of liquidity the Fund intends to hold Hungarian Government securities issued by the Hungarian Public Debt Management Agency and distributed within the framework of the primary government security distribution system. However, according to legal regulation the proportion of equities within the portfolio may be as high as 100%. The Fund's benchmark consist of 95% CECEXEUR Index + 5% ZMAX Index.

MARKET SUMMARY:

In March attention was focused on the Cyprian crisis. According to the expectations part of the holdings above 100 000 euro owned by depositors will be frozen, the other part will be converted automatically into bank stocks. The fact that in such a case the depositors might be involved in the share of losses caused uncertainties in the European equity market. During the month the Italian no-win situation was not solved, the attempt to form of the cabinet proved pointless. S&P 500 reached all time high and the DAX index didn't lag much behind its previous peaks either.

In March all of the following indices dropped: BUX Index fell 5,25%, the Polish equity market lost 1,22% and the Czech market dropped by 2,24% in HUF terms. In the Polish equity market the best performing sector was the chemicals sector, while construction sector lagged behind. Synthos rose by 13,9% due to the higher than expected dividend proposal, TPSA reached one year low and Netia share price fell by 9,1% despite the launch of a buyback program and the announcement of a significant acquisition.

ASSET ALLOCATION OF THE FUND ON 03/31/2013
