Net Asset Value of HUF series:	11,924,333,578 HUF
Net Asset Value per unit:	2.115202 HUF

INVESTMENT POLICY OF THE FUND:

The AEGON Money Market Fund is a very useful investment possibility, which substitutes the classic time deposits. These funds worldwide offer their investors numerous advantages. Money market funds are very liquid, meaning investors can take money out of them on short notice. There is no penalty for taking money out of your money market fund, unlike time deposits. These funds offer competitive and stable yields at a very low risk. According to this, the fund is only allowed to hold very safe investments, like T-bills and Hungarian government bonds with durations lower than two year. Government debt securities are considered very safe because the government has the ability to raise taxes to meet its obligations. The portfolio manager always follows the all-time liquidity and gilt-edged market trends. Since the average duration of the fund is lower than half year, the volatility of the fund is also very low. It is much lower than the volatility of a bond fund, which can contain longer government bonds. The gross yield of the Fund should reflect the yield of the short-term government securities and the yield of the t-bills.

MARKET SUMMARY:

The base rate was cut to 5% in March, the move was monitored very closely by markets as the reshaped Monetary Council ignored the weak HUF to continue easing citing the very favourable inflation outlook after the regulated energy price cuts. Heightened policy uncertainty drove the currency higher while short yields were hammered as the easing bias of the central bank is more articulate. We kept a neutral/slightly short duration offset by off-benchmark Rephun exposure. We lost performance in the second part of March as Rephuns got weaker and short rates rallied as the market realised the weak HUF will not prevent the NBH to cut rates further.

ASSET ALLOCATION OF THE FUND ON 03/31/2013
