Net Asset Value of institutional series:	22,031,696 PLN
Net Asset Value per unit:	1.086285 PLN

INVESTMENT POLICY OF THE FUND:

The aim of launching the investment fund was to give investors access to the Polish bond market, and for it to function as a relatively stable, medium-risk investment in the long term, offering our customers higher yields than those attainable on bank deposits without the need for them to tie up their savings for a fixed period. The investment opportunities available to the fund are wide-ranging, so the portfolio manager has a broad remit and there is scope to build up the optimal portfolio. We aim to achieve the highest return at the lowest risk. When making investment decisions we make equal use of fundamental analysis and technical analysis tools, and always take into account the prevailing mood of investors in the market. The portfolio manager determines the potential investment opportunities on the basis of the macroeconomic forecasts, the likely yield curve and the expected return on the curve and market volatility, then selects the investments that can be regarded as safe and that ensure a relatively high yield in return for the undertaken risk. The fund is benchmarked to the Treasury BondSpot Poland Index (100%).

MARKET SUMMARY:

Worse than expected macro data (USA NFP, Chinese GDP) reshaped investor views.

Inflation expectations were falling again amid sinking commodity prices and core market yields returned near their yearly lows. No wonder all investors again expect a longer period of easy monetary conditions which created another wave of "yield hunt" in EM bonds.

On the top of that quickly collapsing Polish growth and inflation fuels further rate cut expectations so the market moved 50-70 bps lower in April.

We did not expect such a big move after the March rate cut that seemed to end the loosening cycle for a while. We only increased duration to a neutral level as we saw the momentum in the market.

ASSET ALLOCATION OF THE FUND ON 04/30/2013
