## INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide investors with yields higher than those attainable in the money market, at low risk, through the purchase or sale of securities, options or other derivative products. The fund invests most of its available assets in domestic discount treasury bills and short-term government bonds - which have the purpose of protecting the investors' capital - while using the rest to purchase riskier instruments. Given its approach to the purchase of risky instruments, the fund falls into the category of absolute-return funds: it selects, from among the opportunities available in the domestic and international money and capital markets, the investments with the best expected yield/risk ratio. The fund management company, exercising all due care, based on its own judgement and decisions and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with the our expectations with regard to future risks and returns - achieves its objective in the long term. The Fund offers capital protection for first trading day of every year under special condition. The capital protection is ensured by the investment policy of the Fund.

## MARKET SUMMARY:

At the beginning of April the Bank of Japan announced further monetary easing and increased the asset buying program's budget by 50 000 billion yen. The Italian no-win situation was solved as the deputy head of the center-left Democratic Party was nominated prime minister and he formed a coalition government. In April several weak macro data were disclosed. In addition, the Chinese manufacturing index signals the slowdown of the economy. The leading indices continued to rise further and in the US markets new highs were hit during the month, at the same time DAX strengthened close to historical highs.

We increased a bit the weight of the risky assets.
