Net Asset Value of institutional series:	4,635,863,961 HUF
Net Asset Value per unit:	3.875982 HUF

INVESTMENT POLICY OF THE FUND:

A primary consideration when compiling the fund's portfolio is the need to optimise the aggregate risk of the securities to be included in the fund. In the interest of reducing the risk, the utmost care is taken when selecting the securities to include in the fund's portfolio. The risk factors of the securities are analysed, and investment decisions are underpinned with in-depth calculations. An important criterion in the selection process is the liquidity of the securities. The fund buys shares issued by corporations from countries in the Central European region (primarily Hungary, Poland, the Czech Republic, Romania, Slovenia and Croatia, and secondarily, Austria, Russia and Turkey), but it may also invest in the shares of companies in other emerging and developed countries, as well as in other collective investment securities. The fund may hedge a part or all of its currency risks with forward currency positions. To ensure liquidity the fund aims to hold in its portfolio the government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, but in accordance with the statutory regulations the proportion of shares in the portfolio may be up to 100%.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 14.56 %

Annualized standard deviation of the benchmark's weekly yields: 14.85 %

MARKET SUMMARY:

The correction which started in the middle of May persisted in June, primarily the investors worried that Fed is expected to lower the volume of the asset purchase program and it caused the cutback in the risky asset classes. The Chinese weak macro data signals further slow down so it was not a supportive factor in recent sell-off. The leading equity markets fell by 5-10% during the month, DAX came back to 200 DMA, while S&P fell moderately.

After the rise in May, CEE markets suffered a significant drop in June. The Czech equity market fell 9,25%, the Polish equity market dropped 10,8% while BUX Index lost 0,7% in EUR terms. The market was mainly driven by top-down factors rather than company specific news, almost all main sector of the fund closed the month with drop. At the end of June concrete proposals were disclosed concerning the Polish pension fund reform. Initially the Polish stock exchange reacted on the news with a significant drop; however, the price came back by the end of the day.
