Net Asset Value of HUF series:	21,267,595,909 HUF
Net Asset Value per unit:	2.285008 HUF

INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

MARKET SUMMARY:

US 10-year yields drove the sharp correction in the fixed income universe that occurred in May-June as Bernanke confirmed a downsizing of QE3 might happen this year. Both hard currency and local currency EM bonds were under fire as risk premia shot up. EM debt indices fell more than 10% within a month and in some cases erased roughly a yearly return. This and fear from further rising US yields caused record outflows from EM debt funds. Sentiment was not helped by the deteriorating macro outlook towards EM as a whole given the problems in China. We increased the fund's HUF duration and bought some short maturity EUR denominated bank bonds. Given the changing fundamental outlook we decreased the weight of our EM stocks and switched into developed market equities.

ASSET ALLOCATION OF THE FUND ON 06/30/2013
