Net Asset Value of HUF series:	1,255,771,034 HUF
Net Asset Value per unit:	1.072631 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for Hungarian investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

Risk and Reward Profile:

MARKET SUMMARY:

Equity markets managed to recover following a substantial correction in June. Investors kept focusing on QE downsizing issues, tapering jitters, however, gradually faded as the relative lack of newsflow supported market sentiment. The S&P500 hit a new all-time high in July, while kept consolidating at record territory during the second half of the month.

The Chinese manufacturing data touched 11 month bottom in July and increased further the concerns regarding the Chinese growth outlook. Despite the slowdown the Chinese leadership intended to hold the 7,5% GDP growth plan in 2013. The Chinese equity index closed 3,56% higher while Korea gained 3,2% in HUF terms. Indonesia showed the weakest performance and closed 7,2% lower in July.

ASSET ALLOCATION OF THE FUND ON 07/31/2013
