Net Asset Value of PLN series:	110,679,853 PLN
Net Asset Value per unit:	1.980116 PLN

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to achieve a substantial yield for investors by taking high risks and making active use of derivative positions. The fund is decidedly high-risk, particularly due to the derivative positions it takes. The fund is willing to buy or sell all available investment instruments - domestic and foreign bonds, equities and other securities, indexes and currencies - provided it sees the opportunity to make substantial gains. In this respect the fund belongs in the category of opportunistic funds that pursue a multi-strategy investment approach. Within the multi-strategy approach pursued by the fund, 'global macro', 'long-short equity', 'convertible bond arbitrage' and 'managed futures'-type transactions dominate. In terms of asset class, the fund's investments can be divided into three main groups: it takes on extra risk in the bond, currency and equity markets, and in these markets it is prepared to take up both long and short positions within the maximum limits permitted by law, which currently allow double leverage for funds of this type. In its investment decision-making mechanism the fund assesses fundamental, technical and behavioural-psychological factors. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. To ensure liquidity the fund aims to hold government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary.

MARKET SUMMARY:

Equity markets kept rising in September, primarily supported by a worldwide rise in economic leading indicators, particularly China macro showed further signs of recovery. The newsflow was supportive, Middle East tensions quickly eased as Syria accepted a Russian proposal to give up chemical weapons, which put pressure on oil prices, on the other hand. Uncertainties of the QE downsizing schedule also brought in volatility, however, the surprisingly dovish FED meeting as well as Summers' withdrawal from the FED chairman race sparked a relief rally in risk assets with several equity indices surging to new all-time highs in September, but struggled finding further support.

The fund gained on the rise of the Turkish and Russian equity market and the convertible bonds price increase. Richter and Egis contributed to the performance positively too.

ASSET ALLOCATION OF THE FUND ON 09/30/2013
