Net Asset Value per unit:	1.088899 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for Hungarian investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

MARKET SUMMARY:

Equity markets kept rising in September, primarily supported by a worldwide rise in economic leading indicators, particularly China macro showed further signs of recovery. The newsflow was supportive, Middle East tensions quickly eased as Syria accepted a Russian proposal to give up chemical weapons, which put pressure on oil prices, on the other hand. Uncertainties of the QE downsizing schedule also brought in volatility, however, the surprisingly dovish FED meeting as well as Summers' withdrawal from the FED chairman race sparked a relief rally in risk assets with several equity indices surging to new all-time highs in September, but struggled finding further support.

Asian equities overperformed MSCI World global benchmark in September and increased by 2,58% in HUF terms, while the global benchmark increased by 1,02% in HUF terms. The Japanese, Korean and the Indian equity market showed above average performance during the months.
