Net Asset Value of PLN series:	15,139,273 PLN
Net Asset Value per unit:	1.026003 PLN

## INVESTMENT POLICY OF THE FUND:

The fund's aim is to assemble an investment portfolio for its investors that is comprised of both Hungarian and international money and capital-market instruments, which the fund can optimise through ongoing dynamic asset allocation in order to attain the highest possible yield. The fund is a 'total-return fund', which means that instead of concentrating on just one subsector of the money or capital market, at any given moment it focuses its investments on the area that holds the promise of the highest possible return. Accordingly, the fund may hold government securities and discount treasury bills issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary, and also bank and corporate bonds that are low risk but are nevertheless likely to earn a higher return than government securities. Besides these the fund's portfolio may also contain shares listed on the domestic stock exchange and the bourses of OECD countries, as well as the government securities, bank and corporate bonds of OECD countries. The fund does not follow a fixed benchmark, and does not adhere to a permanent ratio of shares to bonds, but aims to constantly change this ratio within a broad range; indeed, it is also prepared to take on currency risk (just as international bond/equity funds tend to) through the purchase of international government securities and equities. At the same time, the fund maintains the option to hedge currency risks.

Risk and Reward Profile:

## MARKET SUMMARY:

We continue to pursue our moderately risk taking approach. Expected further delay in tapering created a benign climate for EM bond markets, it also allows the Hungarian central bank to cut rates easier. We still have some HUF duration in the portfolio - focusing on the short end of the curve. We purchased some quasi-sovereign bonds that lagged the rally seen in sovereign debt. We did not increase equity weight: we bought FTSE 100 index while gradually realising profit on our Richter exposure. We accepted the Servier offer for Egis shares. We opened FX positions: we are short EURUSD, long EURCZK and we also expect the HUF to be weaker.

## ASSET ALLOCATION OF THE FUND ON 10/31/2013
