Net Asset Value of institutional series:	664,943,162 HUF
Net Asset Value per unit:	1.024207 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

Annualized standard deviation of the benchmark's weekly yields:	3.12 %

MARKET SUMMARY:

October started with a correction in the equity markets, the investors concerns was primarily based on the unsolved American budget problems. In the second half of the month the rally was continued due to the improving global macro picture and the equity-bond rotation and several indices reached historical highs. The FED tapering has been cancelled again, but at the same time equity and FX investors reacted sharply on the American macro data announced at the end of October and it caused intensive USD appreciation. The crude oil depreciated further, particularly the North American WTI performed poorly and besides the moderated Syrian tensions, the lesser North American supply capacity was put pressure on the crude oil price as well.

ASSET ALLOCATION OF THE FUND ON 10/31/2013
