Net Asset Value of HUF series:	1,395,667,649 HUF
Net Asset Value per unit:	1.515534 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide investors with yields higher than those attainable in the money market, at low risk, through the purchase or sale of securities, options or other derivative products. The fund invests most of its available assets in domestic discount treasury bills and short-term government bonds - which have the purpose of protecting the investors' capital - while using the rest to purchase riskier instruments. Given its approach to the purchase of risky instruments, the fund falls into the category of absolute-return funds: it selects, from among the opportunities available in the domestic and international money and capital markets, the investments with the best expected yield/risk ratio. The fund management company, exercising all due care, based on its own judgement and decisions and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with the our expectations with regard to future risks and returns - achieves its objective in the long term. The Fund offers capital protection for first trading day of every year under special condition. The capital protection is ensured by the investment policy of the Fund.

MARKET SUMMARY:

This month provided a temporary solution for the US budget and debt ceiling concerns, which was very supportive for emerging market assets including Hungary. Thanks to the very benign global environment the NBH could cut the base rate smoothly by another 20 basis points to a new record low of 3.40%. The reasoning has not changed much: the level of output remains below its potential and inflationary pressures in the economy are likely to remain subdued in the medium term. It is obvious in our view that the Monetary Council will cut the base rate until the global environment allows it. On a more negative note, the implied HUF rates declined to an all-time low of 2,2-2,3%, which is a potential risk to the HUF. All in all, the short end of the yield curve fell further due to the supportive global environment and parallel with the last 20 bps rate cut: yield of 3M-1YR T-Bills fell below 3,3%, 3x6 FRAs hit a new record low of 3,1%.

ASSET ALLOCATION OF THE FUND ON 10/31/2013
