 Net Asset Value of HUF series: 1,285,750,057 HUF
 Net Asset Value per unit: 1.128108 HUF

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields on equity markets in the Asian region, and to profit from the region's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund invests its capital in equity-type instruments of the target countries. The fund aims to create an opportunity for Hungarian investors to invest in equity markets that are representative of the Asian economies. The most important target countries are Hong Kong, India, China, South Korea and Taiwan, but the fund also invests in the capital markets of other Asian countries. This may be achieved through the purchase of individual shares or through collective investment instruments. The fund plans to invest predominantly in the latter, and accordingly, it primarily buys into exchange-traded funds (ETFs) and open-ended public investment funds. In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%. The fund only invests in investment vehicles whose expense ratio is less than 2.5%, though it always strives to ensure that the overall average fee burden does not exceed 1%.

 ☐ very high

MARKET SUMMARY:

The leading equity indices hit new highs again in November. The increase was supported by strong macro data and the rotation from bond to equity markets. The Chinese reforms had positive effects as well. These measures typically have an influence on longer term, but in short term the impact is likely to lag behind from last year's stimulus. Due to the upcoming FED tapering, USD strengthened further, however, in the second half of the month there was a break.

After the third plenum the Chinese Communist Party revealed the reform package which focus on 16 area, including tax reform, interest rate liberalization and abolishing the one child policy. The Chinese leadership set the aim to increase the role of the market while they intend to lower the role of the government in resource allocation. The market felt disappointed because of the lack of details on the package. At the end of the month BoJ announced that it continues its asset purchase program invariably and they didn't change the interest rate.
