Net Asset Value of EUR series:	943,593 EUR
Net Asset Value per unit:	0.978883 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to grow the euro-based savings invested in it through returns that exceed the interest rates attainable on bank deposits. The fund is a money-market fund with a broad investment policy, issued in euro, which combines the fund management company's emerging-markets expertise with the safety of classic money-market funds. The fund may invest in the investment instruments permitted by law, with special regard to the money and bond markets. The fund may not hold shares. The fund's investment focus is on short-term government and corporate euro bonds. In the interest of achieving a stable traded price and low volatility we keep the fund's interest risk low; the fund's average modified duration may not exceed one year. Besides traditional money-market instruments (treasury bills, government securities), the fund aims to ensure a higher yield than that of traditional money-market instruments by purchasing mortgage and corporate bonds, and by taking advantage of the premiums that these offer. When selecting these instruments the fund sets strict quality requirements, and may not hold securities that are below investment-grade or do not have a credit rating, except for bonds issued or guaranteed by the State of Hungary. The fund can only open long positions, and is not permitted to open uncovered short positions. It may only open forward contracts for the purposes of hedging or portfolio optimisation. The fund may not use leverage. The fund aims to choose as freely as possible among the opportunities available in the domestic and international capital markets, exercising the caution that is consistent with the fund's investment strategy. The fund records its assets in euro, and endeavours to fully hedge its exposures in other currencies.

MARKET SUMMARY:

The focus still remained on the American liquidity pump in November: the investors were assessing the fresh macro data coming from the world's biggest economy as they were trying to figure how those would affect the start date of the Fed's tapering. As the published GDP and employment figures beat the consensus, investors expectation of the tapering has shifted to an earlier date causing turbulence on the bond markets. Meanwhile the European Central Bank decided to ease its monetary policy further and lowered its benchmark rate to 0,25%. The divergence of the American and European monetary policy was palpable on the bond markets as the 10 year Bund has not changed much in November while the yield of the 10 year US Treasury has increased by 20 basispoints. The emerging market sovereign bond spreads have widened from 325 basispoints to 356 basispoints while the emerging corporate bond spreads have not changed during November.
