Net Asset Value of HUF series:	445,619,329 HUF
Net Asset Value per unit:	1.344529 HUF

INVESTMENT POLICY OF THE FUND:

The aim of launching the investment fund was to give investors access to the Polish bond market, and for it to function as a relatively stable, medium-risk investment in the long term, offering our customers higher yields than those attainable on bank deposits without the need for them to tie up their savings for a fixed period. The investment opportunities available to the fund are wide-ranging, so the portfolio manager has a broad remit and there is scope to build up the optimal portfolio. We aim to achieve the highest return at the lowest risk. When making investment decisions we make equal use of fundamental analysis and technical analysis tools, and always take into account the prevailing mood of investors in the market. The portfolio manager determines the potential investment opportunities on the basis of the macroeconomic forecasts, the likely yield curve and the expected return on the curve and market volatility, then selects the investments that can be regarded as safe and that ensure a relatively high yield in return for the undertaken risk.

MARKET SUMMARY:

On monetary policy front there is no significant change to report: although growth recovery remains gradual, there is a general agreement among MPC members that the reference rate should remain unchanged at least through mid-2014, as the MPC does not expect this to translate into any inflationary pressure over the policy horizon. Meanwhile, the last FOMC statement was interpreted as a bit more hawkish, which was accompanied by better than expected US macro numbers later. These were the main reasons behind the deterioration of the global sentiment, which were only slightly offset by the surprise ECB rate cut. The changing global sentiment was mostly reflected in steepening of the Polish yield curve. With yields rising during the month we slightly increased risk in the fund.

ASSET ALLOCATION OF THE FUND ON 11/30/2013
