Total Net Asset Value of the whole Fund:	27,311,894 PLN
Net Asset Value of institutional series:	27,306,179 PLN
Net Asset Value per unit:	1.288772 PLN

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey; although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

The leading equity indices hit new highs again in November. The increase was supported by strong macro data and the rotation from bond to equity markets. The Chinese reforms had positive effects as well. These measures typically have an influence on longer term, but in short term the impact is likely to lag behind from last year's stimulus. Due to the upcoming FED tapering, USD strengthened further, however, in the second half of the month there was a break.

The Polish equity market jumped by 1,7% in EUR terms outperforming the MSCI EME index by 5,5pts. In November macro data were strong; the latest PMI numbers improved further confirming the improving trend of the economy. The latest news concerning the Polish pension funds is that pension funds are obliged to hold at least 75% of their assets in equities in 2014. In November the best performing sectors were oil&gas and food and in terms of individual stocks Bogdanka performed the best. On the second half of November Bogdanka announced that it had increased the value of coal supply agreement with Energa. Cyfrowy Polsat announced that it will merge with Polkomtel which is the leading mobile operator in Poland.
