Total Net Asset Value of the whole Fund:	23,034,606 PLN
Net Asset Value of institutional series:	23,028,625 PLN
Net Asset Value per unit:	1.208172 PLN

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey; although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

MARKET SUMMARY:

The leading equity indices moved in different path in the first part of December. While on the over-positioned European markets there was a correction due to the low liquidity, S&P500 and NASDAQ Composite were more resistant against profit taking. In the middle of the months markets welcomed the announcement that Fed will begin to cut back the monetary stimulus. The statement surprised the consensus and strengthened the view in case of growth prospects. The low liquidity Christmas season was considerably hectic. The leading equity indices hit new highs, the American dollar weakened 2-year low against the euro and due to liquidity tightening outlook the precious metals hit summer lows. Majority of the regional indices fell in December; the Polish WIG20 index fell 5,9% and the Czech market declined by 4,3%, however, BUX index gained 0,4% in EUR terms. PMI in CEE weakened in December, but still remained above the 50 threshold level. Even though manufacturing PMI weakened in Poland, industrial production and retail sales went up. In the beginning of December the Polish parliament approved that the transfer of 51,5% of the assets held by pension fund will be on 3 February 2014. In December all of the Polish sectors were in the red.
