Total Net Asset Value of the whole Fund:	6,788,364,612 HUF
Net Asset Value of EUR series:	51,188 EUR
Net Asset Value per unit:	0.863122 EUR

INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields: 11.35 %
 Annualized standard deviation of the benchmark's weekly yields: 11.38 %

MARKET SUMMARY:

The leading equity indices moved in different path in the first part of December. While on the over-positioned European markets there was a correction due to the low liquidity, S&P500 and NASDAQ Composite were more resistant against profit taking. In the middle of the months markets welcomed the announcement that Fed will begin to cut back the monetary stimulus. The statement surprised the consensus and strengthened the view in case of growth prospects. The low liquidity Christmas season was considerably hectic. The leading equity indices hit new highs, the American dollar weakened 2-year low against the euro and due to liquidity tightening outlook the precious metals hit summer lows. The crude oil performed mixed in December. Brent closed the last month practically unchanged, while WTI strengthened a lot from depressed November levels.

ASSET ALLOCATION OF THE FUND ON 12/31/2013
