Net Asset Value of institutional series:	10,769,012 PLN
Net Asset Value per unit:	1.067097 PLN

INVESTMENT POLICY OF THE FUND:

The aim of launching the investment fund was to give investors access to the Polish bond market, and for it to function as a relatively stable, medium-risk investment in the long term, offering our customers higher yields than those attainable on bank deposits without the need for them to tie up their savings for a fixed period. The investment opportunities available to the fund are wide-ranging, so the portfolio manager has a broad remit and there is scope to build up the optimal portfolio. We aim to achieve the highest return at the lowest risk. When making investment decisions we make equal use of fundamental analysis and technical analysis tools, and always take into account the prevailing mood of investors in the market. The portfolio manager determines the potential investment opportunities on the basis of the macroeconomic forecasts, the likely yield curve and the expected return on the curve and market volatility, then selects the investments that can be regarded as safe and that ensure a relatively high yield in return for the undertaken risk.

MARKET SUMMARY:

PLN quickly reversed the losses suffered in January, the bond market also remained strong, particularly in the second half of the month. The base rate was left unchanged and the forward guidance of unchanged rate until mid 2014 was confirmed. A less successful auction at the middle of the month still showed some uncertainty in the market, but the settling dust after the pension transfers might present a better entry opportunity for some market players at these levels.

ASSET ALLOCATION OF THE FUND ON 02/28/2014
